Reasons For Allowance

Claims 1-20, 33-60 and 73-82 have been allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 41 recite the structural limitation of a sortation system comprising at least one supply line including an accumulation conveyor and a slug conveyor, where the accumulation conveyor accumulates product in slug portions having a plurality of product, and where the slug conveyor combines slug portions into product slugs, a control monitoring the sorter assembly and controlling the slug building assembly whereby the control causes the slug building assembly to release product as a function of the product the sorter assembly is sorting, in combination with the rest of the recited structure, clearly defines over the prior art.

Independent claims 33 and 73 recite the structural limitation of an apparatus and method of discharging product to the conveying surface to build slugs wherein the conveying surface receives product from the accumulation conveyor at a first continuous speed to build slugs and discharge slugs of product at a second speed that is substantially higher than that of the first speed, and a control monitoring the sorter assembly and controlling the at least one supply line to release product as a function of the product the sorter assembly is sorting, in combination with the rest of the recited structure, clearly defines over the prior art.

Art Unit: 3651

Independent claims 81 and 82 both recite the method and apparatus limitation for all the claims listed above, in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
